

Quicker Multiplication

Overview: If you don't have the patience to do multiplication on paper for every single math problem that comes your way, then you'll really enjoy this math lesson! You'll be able to multiply one and two digit numbers in your head, which you'll be able to use when checking your answers on a math test, or just whenever you need to multiply something quickly when paper's not around.

What to Learn: We're focusing on one and two digit multiplication. If you haven't already mastered your multiplication tables, make sure you have one handy to refer to as you go along.

Exercises: Write down your answers, and then check yourself with a calculator.

1. 23×4
2. 81×7
3. 71×5
4. 25×8
5. 29×7
6. 53×6
7. 62×9
8. 17×7
9. 33×6
10. 85×7
11. 89×9
12. 97×7
13. 79×7
14. 49×8
15. 99×9
16. 20×14
17. 20×19
18. 30×83
19. 40×54
20. 80×96
21. 50×58
22. 60×84
23. 70×67
24. 90×78
25. 50×98
